

## Itasca Gun Club Safety Policy for Sight In Days

IGC's priority at any event is safety. Firearm safety is the top priority.

### **Firearm safety:**

All firearms must be unloaded. The only time a firearm is loaded is when a shooter is stationed at a bench and is ready to fire at targets. Firearms are loaded one round at a time regardless of the type of action or type of magazine.

When you arrive, we have a check point where we check your firearms(s) to verify that they're empty, the action works correctly, there are no bore obstructions and that you have the right ammo. Every now and then a firearm will show up loaded, or someone grabbed the wrong box of ammo. Keep muzzles pointed up.

### **Personal safety:**

We can't sanitize and re-use earmuffs for up to a thousand shooters. We will provide disposable foam earplugs, and if you have safety glasses, bring them. We will have limited shooting glasses available for sale. Bring your own shooting muffs if you prefer those over plugs. You must wear eye and ear protection or sign a waiver.
